

EASY RIDER

The ultimate feel-good coffee. Easy like Sunday morning, this blend is smooth enough to handle any bumps in the road of life. It brims with sweet notes of chocolate and hazelnut – for which Central and South American coffees are renowned. And is made with love.

The story

An easy-to-drink organic blend that is a very good fit with everyone. Sweet, yet mild acidic. The obvious choice for those who are looking for a good quality organic coffee.

COMSA, Honduras

Easy Rider comes from the COMSA cooperative (short for Café Organico Marcala S.A.) in the Marcala region in Honduras – a famous coffee region that has already been awarded several prizes for the great quality of its coffees. The area of Marcala is located on the slopes of the Montecillos mountains at an altitude of 1200 - 1600 metres above sea level.

COMSA is made up of 69 members who work together to grow and process 100% organic coffee using new, innovative methods.

The farmers put great emphasis on preserving the flora and fauna of the region. They promote diversification of crops and biodiversity; citrus fruits and bananas are grown in direct proximity to the coffee.

The coffee is produced under strict norms of organic production and is almost entirely shade-grown. This allows the cherries to develop over an extended period of time which intensifies the flavours in the cup. The farmers also process their coffee using the washed method which creates a very clean and sweet taste. One that everyone loves to drink!

Head Roaster & Q-manager Thijs about Easy Rider:
“The obvious choice for those who are looking for a good quality organic coffee.”
